'Gesto' was created over the course of a two year improvised sessions recorded on two tracks, without any overdub, from 2015 to 2017. It is the result of the two artists' visions of electro-acoustic music, combining their respective sensitivities into an intricate microcosmos of freeform sound grids. Employing different sound sources like synths, cheap electronics, samples and a vintage tape echo, the album floats between deconstructed textural dub and musique concrète, escaping any genre identity.
